**第一节 【参考范文】**

Dear Elisa,

I'm glad to hear from you and share my high school life.

Life at senior high is very different from that at junior high. I have a busier schedule with different subjects such as Chinese, English, maths, and physics. My new teachers and classmates are friendly and supportive. We often take part in discussions and debates in class, allowing for a healthy exchange of ideas.

Thinking about the future, I hope to continue my studies in a famous university. I look forward to hearing about your life in the UK.

Yours,
Li Hua

**第二节 【参考范文】**

They all waved goodbye one by one, leaving me alone in the house. I ran to my room and closed the door, crying myself to sleep. Suddenly, I heard something. I observed my surroundings, but there was nothing unusual in my bedroom. I jumped out of my bed, certain that someone was in the house. "I... I've already called the police. You can't escape!" I shouted. I knew that my threat sounded useless and worthless, but I had to give it a try. With all my courage, I opened the door.

"Surprise!" a lot of voices called out. Trying to find out what was happening, I looked around. All my friends, my parents and my brothers came inside the room, holding my birthday cake. I felt so overwhelmed and began to cry. "Oh, I thought you all had forgotten," I said, fighting back tears. "Not as long as I am alive," came the voice of a lady. Someone was standing at the door—it was my grandmother! I rushed to her and gave her a hug. That was the best birthday of my life!

Good morning, boys and girls,

The topic of my speech today is “Family Education Shapes Me”. Family education has always deeply influenced me. It has benefited me a lot.

Remember once, my teacher gave me a prize when I got full marks in an exam. But when I got home, my mother found a mistake on the paper and asked me to explain the situation to the teacher. I did what Mom said. The teacher asked me to keep the prize as a reward for my honesty. Although I lost full marks, I gained the beautiful quality. My honest family education has served me well all the way and has cleared away many obstacles in my life. I owe thanks to my parents.

Thank you for your listening!

第二节 【参考范文】

Then I walked towards the woman with hope. When I was close to her, she turned back and was shocked to see me. I apologized and told her our problem. “Can you give us some directions? That is my friend,” I added, pointing to Doris, who was still under the tree. The woman managed a friendly nod and a gentle smile. She seemed to relax as she inspected us and asked where we were trying to go. And then she attempted to give us directions in broken English.

I found her explanation of directions only confused us, however hard she tried. Then the woman said, “Get in my car. I'll take you back.” “That's really nice of you, but we don't want to get your seats wet,” we responded, pointing to our wet clothes and bags. But our rescuer insisted. We were so tired that we finally went inside. To our excitement, we soon reached our hotel. When we offered her fees, she just declined and wished us a good night. Waving goodbye to her, we saw her disappearing in the darkness. Although we were cold, our hearts were warm.

Dear fellows,

With the development of industry and agriculture, environmental problems are becoming more and more serious all over the world.

Vast forests have been cut down and waste water has been poured continuously into rivers. Furthermore, the whole ecological balance of nature is changing. The environmental destruction has negative effects on man's existence. It's high time that we should take action to cope with environmental problems. For instance, the industrial enterprises should comply with the regulations regarding industrial development. Besides, the necessity and public awareness of environmental protection should be spread and raised via the media.

We hope that these measures will be effective and bring us a better future.

The next day, Mrs Murray talked to Timmy again. She told him about her idea of the special reading club. Timmy looked at her with doubt in his eyes. Mrs Murray explained that it would be just the two of them, and they would take it step by step. She assured him that she would be there to help him every step of the way. Slowly, Timmy's face showed a hint of a smile and he agreed to give it a try.

After a few weeks, Timmy made good progress. He could read simple sentences without many mistakes. His confidence grew, and he no longer dreaded reading aloud in class. One day, during a science lesson, Mrs Murray asked Timmy to read a paragraph. He read it clearly and fluently. The whole class clapped for him. Timmy's face shone with pride. Mrs Murray was happy to see the change in him. She praised his efforts and encouraged him to keep going. Timmy knew that with hard work and Mrs Murray's support, he could overcome any challenge.
